Daroy Perkins

Baltimore, MD | +14435786820 | daroy.perkins@gmail.com

Professional Summary

Commercial solar construction Superintendent with 14 years in PV, from crew lead to running large-scale rooftop projects end to end. Currently superintending the Lowes Salisbury rooftop project (#25-0726, ~1.4 MW) in Salisbury, MD, leading a 20–25-person crew — daily production and manpower tracking in Procore, cost-code management, QA/commissioning documentation, and IRA prevailing wage compliance. Strong electrical background (NEC, megger/IR testing, SolarEdge inverter systems); pursuing Maryland Journeyman Electrician license. Focused on safety, production efficiency, and building crews that perform.

Willing to relocate: Anywhere

Work Experience

Superintendent

Solar Gaines | Baltimore, MD

January 2026 to Present

• Lead superintendent for large-scale commercial rooftop PV projects (SEG 585W modules, SolarEdge SE120KUS inverters, PanelClaw ballasted racking)

• Currently superintending the Lowes Salisbury rooftop project (#25-0726, ~1.4 MW) — 20–25-person crew across racking, module, wire management, and electrical scopes

• Completed closeout and commissioning package for a 1,966-module, 7-inverter project (Westminster, MD): QA checklists, torque verification, megger/insulation-resistance logs, and as-built redlines

• Daily production and manpower reporting in Procore across six cost codes; weekly production metrics to senior PM leadership

• IRA prevailing wage compliance: task-based wage classification, payroll reconciliation, and crew time coding

• Material management: takeoffs, BOMs, vendor ordering, and cost-code assignment

• Crew development: toolbox talks, training, and performance documentation

Field Service Technician

Sunrun | Beltsville, MD

May 2025 to December 2025

• Performed service diagnostics and troubleshooting on residential solar and battery storage systems across the Beltsville service territory

• Completed warranty and service dispatches, meeting turnaround-time and customer experience targets

• Diagnosed system faults from roof to meter, including modules, inverters, monitoring, and interconnection

• Conducted inspections and site audits on previously installed systems

• Supported onboarding and training of newer field service technicians

Solar Superintendent

Neo Energy | Washington, DC

September 2020 to May 2025

- Managed foremen and facilitated daily task assignments
- Managed project pipeline and daily operations
- Monitored system efficiency and maintenance
- Surveyed sites and produced preliminary design drawings
- Projected costs and profitability for system installations

Solar Installation Supervisor

Grid Alternatives | Washington, DC

January 2020 to September 2020

- Responsible for all technical and safety aspects of PV installations
- Trained and mentored volunteers, job trainees, and staff in solar installation and related construction activities
- Led installations of solar electric systems with crews of volunteers and job trainees
- Ensured all installations met GRID Alternatives safety and quality standards
- Supported warehouse and tool organization, fleet maintenance, construction logistics, and systems implementation

Field Operations Installation Lead

Suntuity Electric LLC | Lanham, MD

January 2019 to December 2019

- Trained Suntuity employees and third-party contractors on quality standards, best practices, new products, and process rollouts
- Coordinated with suppliers, engineers, and project teams to drive successful completion and closeout of designed systems
- Led a 4-man crew on daily installs across residential, ground mount, and commercial projects

Field Service Technician

Vivint Solar | Beltsville, MD

July 2018 to December 2018

- Provided service and customer support during field visits and dispatches
- Managed all on-site installation, repair, maintenance, and test tasks
- Diagnosed errors and technical problems and determined proper solutions
- Cooperated with the technical team and shared information across the organization

Lead Field Trainer

Greenscape Environmental Services | Washington, DC

January 2018 to June 2018

- Created a solar training curriculum from scratch for disadvantaged and low-income youth
- Recruited, interviewed, and hired low-income youth in the Ward 7 area of DC to learn solar installation
- Trained crews on commercial projects across multiple applications including flat and shingle roofs
- Troubleshot existing solar installations across the DC area not originally installed by GES

Crew Lead

SolarCity (acquired by Tesla) | Beltsville, MD

January 2012 to December 2017

- Daily installation of solar systems on residential houses, some installation of commercial ground mounts
- Daily management of 10-man crew including scheduling, job preparation and commissioning
- Uninstall & Reinstall
- Animal Mitigation
- 35 MW installed all-time
- Youngest crew leader in company history

Education

High school diploma or GED

Skills

HAZMAT protocols **Blueprint Reading** **Electrical safety procedures** **Installation** **Solar microinverters** **Subcontractor coordination** **Ground-mounted solar energy systems** **Grounding systems** **NFPA 70E electrical safety protocols** **Grid-tied solar energy systems** **Project Management** **NFPA 70 compliance** **Electrical diagnostics** **Prevailing wage compliance** **Clamp meters** **Electrical troubleshooting** **Renewable energy systems** **Working as a solar technician** - Solar technician experience (11–15 years) **Solar commissioning** **Fire safety protocols implementation** **International Electrotechnical Commission (IEC) standards** **Electrical wiring for solar energy systems** **Solar blueprint interpretation** **Solar energy systems testing** **Photovoltaic system installation** **Construction** **Electrical experience** **Field Service** **Schematics** **NEC** **Production tracking** **Industrial electrical systems** **LOTO** **QA/QC documentation** **Bifacial solar panels** **Solar battery storage systems** **Photovoltaic systems** **Solar schematics interpretation** **Solar power optimizers** **IEEE standards implementation** **Commercial Electrician Experience** **Net metering solar energy system diagnostics** **AC/DC electrical systems** **Fall protection protocols** **Electrical blueprint reading** **Roof-mounted solar energy systems** **Solar panel installation** **Microgrid systems** **Onshore renewable energy** **Safety management** **OSHA** **Attention to detail** **Program Development** **Troubleshooting** **Solar installation** **Insulation testers** **Cost code tracking** **Training** **Material takeoffs** **Scaffolding safety protocols** **Photovoltaic system troubleshooting** **Multimeters** **Penetration-mounted solar energy systems** **Utility electrical systems** **Troubleshooting electrical systems** **Underwriters Laboratories (UL) standards** **Monocrystalline solar panels** **Procore** **National Electrical Manufacturers Association (NEMA) standards** **Delegation**
